

Task 1: I am glad to hear that you are going to visit my country , it is very beautiful here . The weather is really hot and sunny so just bring some short sleeves shirts and shorts or some tanktops . Don't worry about it too much because if you don't have enough, i will buy some for you, the clothes here are really nice. I am looking forward to seeing you soon. Task 2: A successful film doesn't always need famous actors, i think, because it's not about the actors, it's about the way how the actors act. The way they show the emotion and acts of characters in the film is the most important thing because that is the thing that makes the audiences exciting about the film, the thing is to make them understand the characters. A successful film can not success just with famous actors , another thing that may help the film success is advertising. That film may not have the most famous actors to have people's attention star but advertisements can attract more and more audiences to see the film. If the film is advertised everywhere, everyone can see it , more people will come and watch the film , then it will earn more money and make it successful.
