Nowaday,Fashion in clothing is limitless. Now we have a lot chances to choose for us favorite clothes. But everybody has his own type of fashion in clothing. I do, too. People working in offices wear Jean and T-shirts it make people comfortable when people work, It is very cool and convenient. I'm a student university and I define my favorite style as 'ordinary style'. Because I don't want to be outstanding. I like to appear normally with the most comfortable style and it's easier for me to play with my friends. For more details, I like jeans combined with a T-shirt. This style makes me look young, exotic and formal. task1: Dear DOVAN! I will have a party on Sunday. Could you come party? Party will be start in my home at 8a.m Sunday.
