

Task 1: How is your new CD? Is it great? My favourite band is Big Bang. They are very famous. they are Korean. I listen to their music almost every day which is very interested and amused. I think I like the most about Big Bang because they are all handsome and they have made great music. Task 2: There are some opinions say that "Shopping online is better than going into shops." but I don't think so. Just imagine, one beautiful day you walk into the shop and then you choose some nice clothes and you try it on. Some look nice when they hang them on the shelf, but when you put it on you it look terrible. Even though there are some clothes that look wonderful on you. And then you come to your decision of what to buy and what not. It's a big deal right? In my opinion, I won't waste money on what that not deserve. But if you shopping online, you can try the clothes, you can't know if it fit you or not. I know many situation which happen to my friends. One of them ordered something online, a splendid dress with white color and trending style. She got it a few days later. But when she wear it on, It looked ugly, it was not the same dress in the picture and she was very angry about it but she could not do anything because the motto of the shop is "No return" and she had already given them the money. So be careful with what you buy online,
