

Task 1: Dear Paul, It is great to meet you this Saturday. I forecast it will rain this weekend, so I will come there by taxi. Vincom Longbien has so many great films every evening, why dont we come to enjoy it. I am sure I will come to your home at 7pm, then we will go to see Now you see me 2 in Longbien movie. See you soon.

Huyenthanh Task 2: Several of people think: "The best thing about today's films is the special effects". I think so. Cinematic portrayals of war, epic fantasy battles and fiction brought to life are all prominent parts of filmmaking as we know it today because of special effects. They can turn an artist's vision into an icon of popular culture and they can make each film unique from the last. Without the imagination that goes into ground breaking special effects we'd have no variety whatsoever in the modern film industry. We can speak to such as transformers films. Michael Bay's robot science-fiction film was met with immediate praise from critics and the general public after viewing, most notably for its breathtaking special effects. The film was nominated for four Oscars regarding its visual technologies used, and it's not hard to see why. This film has spawned two successful sequels, the latest being the 4th highest grossing film of all time. Michael Bay spent a fortune on the special effects in Transformers, and it easy to see where the money went. This film is the finest example of modern day technology for special effects. In summary "The best thing about today's films is the special effects" exact complete.
