

Task 1: Hi Alex, I am glad that you are going to visit my town next month. Fortunately, I have the answer for your questions. The swimming pool is pretty vast and clean. The owner filters and changes the water frequently, so you don't have to worry about its condition. You can use public transportation from the town center to go to the swimming pool. The 44 bus will drop you right at the pool because it is the bus's final destination. The best time to go is in the morning because the water is cleaner than the rest of the time. You're welcome! Love, Thanh

Task 2 The family is the foundation of the society. In most of the cases, a decent family will grow better individuals that benefit the community. Therefore, family is an important topic to carry out. I agree that living in a big family has both advantages and drawbacks. For instance, I will use a real example. My family is a pretty big. There are my grandparent, my parent, my two siblings and me. In total, there are seven people from three generations. First of all, the advantages are the heritage that my grandparents will leave behind and the amount of love that my siblings and I receive. I learn a lot of lessons from my grandmother such as poetry and cooking. On the other hand, my grandfather teaches me how to study well in school. And the best thing is I get a wonderful care from both my parents and grandparents. Last but not least, there is one drawback living in a big family. I often see how the younger generation creates conflict with the older generation. My grandparents live in a more conservative way. Meanwhile, I am more social and more open about life. In conclusion, living in a big family has both advantages and drawbacks. However, I love my big family, and I will try not to lose any of it.
