Task 2: Successful film famous actor just is not quite accurate. Famous actors, there would be more people watching it is also a success. But now the viewers attention to the actor's action. Their acting role to the characters in the film without eating in, they will not be content transmission and this film will make audiences not interested in any more movies. For action films, then this is even more important. The effects in the film, if not handled skillfully made film will become a disaster. Coupled with action films, the more they are interested in this and all the action, sound, light, technique character in the film is processed. If the content of a film is not attractive, it is not interesting for the viewers especially those who enjoy movies. There are many movie without famous actors and still succeed. This proves that the actor is only one factor to the success of a film, not all.
