The firstThe one who are always there with you, whether the times are bad or good.....are called friends. They never leave your side, even if the situation is worst. For them, it doesn't matter what day is it or what season. When we are sad, its our friends only who make us comfort, and laugh with us when we are sad. They give us good advice, and we can count on them to treat us nice. Friends solve our stupid problem and share good time so that joy can become double. The second, Friends are the only one who accepts us as we are, also correct us when we are wrong. Friends are the ones with whome we can share our darkest secret. They acknowledge our all ideas even the worst one. Friends never expects anything in return. they stay with you throughout your life. They are the biggest support in our life. We feel secure when our friend is with us. In short, to have a friend is extremely necessary ,
