

Task 1: Dear Jan, We are planning to go to the movies tomorrow. We will see the film with title "Now you see me 2". It's very interesting. It is a very good content films, eye-catching morphing and a beautiful cast. In the film they used magic to Rob wealthy people's money to the poor. It is the movie that I would like to see this summer. I hope you also enjoy watching it. Your friend, Trang

Task 2: I think "Watching television all weekend is not good for you" is true. Because then you just sit still a place that is not active. That is not good for our health. If you watch tv for too long, We'll have the risk of obesity and back pain. Further, it will make us depressed. Because we are only in the house but not in contact with anyone. That will make our life become really tedious. So on the weekend we should go out and play with your friends. And take a moment to participate in sports activities to cause us to become healthier. That's all my opinion about it.
