Task 2: These events occurred in recent months, particularly disappearances and accidents of 2 flights Malaysia Airlines MH370 and MH17 bearing number has made many people believe that air travel is increasingly less secure. However, the fact that travel by air safer than ever before. Number of operating aircraft worldwide over 2x compared to 25 years ago, while the proportion of fatal accidents declined sharply. In fact, after being adjusted to limit inflation, average airfares were down about 50% in the past 3 decades. Although charges have increased a little in 2013, but still much lower than 30 years ago. My feeling is, it's still expensive.
