2 The fashion style meaning that everything we wear on our body. When we wear, of course, we may feel nice but maybe other ones may see not nice. With me, I would like to be casual than formal normally because I am simple, and I feel more comfortable than I wear in formal. In real world, anybody has condition to wear formal will look him better and many people want to see him but beside that there is a high cost to maintain it. In general, I wear casual day by day, and at the special days, maybe I wear formal suits.
