

Task 1: Dear Jan, I'm writing to invite you to go to the cinema with me tomorrow. The film we'll see is called 'Transformer: The Age of Extinction'. It'll start at 4pm so we'll meet each other at 3.30pm before the cinema. I think that this movie will be very interesting, because all the other parts of it had a huge hit in the theaters in the past. Moreover, it is a 3D picture, and has lots of computer graphics effects in the actions. I hope that you will accept my proposal, and we will meet soon. Love, Huong.

Task 2: I agree with this opinion. Firstly, watching television affect directly your health, your physical body, especially your eyes. If you watch TV so much, your eyes will become worse that you can see distant objects. Moreover, your muscle will be week. Because when you have to work all day in week, weekend will be the day for you to play sports or do some exercise. And if you use it to watch TV all day, you can't do these things. Secondly, watching TV is not good for your morale. Imagining, you have a hard working week, so on the weekend you want to relax, but you spend all day to watch TV. It will make you more stressed instead of making you comfortable. That all I want to say about: " watching television all weekend is not good for you".
