

Task 1: Dear Jane, We could go walking in the park near my house. An early morning walk in an open green field helps us inhale fresh oxygen, and makes us feel fresh and active. We need warm clothes because it's going to be cold this weekend. Don't forget bring your camera so we can take some pictures. Love, Ngoc Anh

Task 2: It is undeniable fact that travelling has become one of the most preferred leisure activities. A large number of people hold the opinion that travel experiences bring with it significant benefits. Others, however, feel that it is waste of time and money. I would like to express my opinions as below. During travels we have a chance to enlarge our vision and increase our knowledge. We have a chance to explore different culture when we interact with local people. Besides that, couple like to go on travel because it will enhance the relationship. They will have a lot of sweet experiences when they're in a romantic place. On the other hand travelling always costs a lot, in term of money and time. As we know, preparation is needed before a trip. A lot of time will be spent on doing research and planning. But I think we should go travel at least one in our life.
