Task 2: I have two comments on the matter . The first, idea isn't to put the animal in the zoo because it will lose the flexibility , survivability and the nature of them . where if we do not lock them , the ability to cool the eggs of the animals is very high because these acts illegal hunting and smuggling of guys last. opinion afraid the answer isn't so. Task 1: Dear ERIK Tonight, I want to eat fish because it is vitamin E and it's very good for your heart of course with vegetables , we can't eat it even if it is not delicious . Vegetables have lots of fiber , so I think you and I should eat more it . I will be at home in the evening , so you should to my house since seven o'clock . Thank you for cooking for me .
