1. Dear Alex, I recieved your postcard yesterday and I'm really glad to see you. I'll pick you up at the Airport. And I have something to tell you that what should you bring there. My country Vietnam is very hot now becauase now in in the middle of summer, it's hotter than "hot". I think you should bring T-shirt, shorts, tank tops... and remember to bring sun cream to protect your skin. I think hat and glasses are the best choice too. See you later at the airport. Have a save flight, Alex. Best Wishes Linh 2. There are a lot of successful films in the world and in my opinion a film become to be succesful not only needs famous actors. The first, a nice film must have a good story. People will not feel happy if they watch a film which no makes sense. It's not logic. The second, a successful film needs a good director. A director is a person from a group of managers who leads or supervises a particular area of a company, program, or project. Without director the actors cannot perform their works in order. They have many famous actors but the director isn't have many experiences so the film will going to be bad. The third, this film needs amazing special effects. Without effects, the film will going to be boring. There are many successful film because of amazing effects such as : The Advengers, X-Men, Jurrais World... To be sum up, a successful film not only depends on famous actors, it is depend on others important "factor".
